

BUD BOOSTER

For healthy, beautiful blooms.

Alive with pioneering know-how, Reiziger Bud Booster is one of the most innovative boosters ever made. The essence of simplicity - with signature levels of vitamins, amino acids, saccharides and micronutrients - it forges a precise path through an ever-changing world.

“ AN ESSENTIAL PART OF MY FLOWERING REGIME. REIZIGER BUD BOOSTER IS THE BEST CHOICE. ”

- Pieter De Vries

FORMULA

Helps medicinal plants build extremely large, crystal-laden blooms.

More than just a multi-stage flowering booster, this hydroponic biostimulant represents a leap forward in nutrient formulation. This is everything craftsmen growers want in a premium booster formula, maybe more. Every aspect of the formula has been refined from the natural growth hormones, to the amino acids, to the micronutrient ratio balance that will help you gain the full advantage from your hydroponic system. Rich in organic flowering regulators that optimise the flowering metabolites and energy inherently available within the plant enabling blooms to develop uniformly and ripen to their full potential.

TECHNOLOGY

Stacks on biomass when buds transition to flowers or fruits.

Engineered from seed and medicinal plant extracts, Reiziger Bud Booster enhances the enzymatic and proteic regulation, increasing the glandular density and compound content in the plant. Everything about Reiziger Bud Booster is designed to effortlessly increase glandular trichoma densities, precursor production and enzyme activity.

The perfection of Reiziger Bud Booster comes down to precision and patience. Natural hormones that regulate growth and various developmental processes have been thoroughly integrated within the formulation so that they are freely available to the plant to stimulate the synthesis of RNA and proteins, so you can concentrate on a faster flowering stage. And the phytoalexins, vitamins and phenolics allow you to access improved quality, quantity, stress resistance and concentration of resins.

PERFORMANCE

Performance and prestige for skilled breeders.

To make the life of a demanding craftsman a little simpler, Reiziger Bud Booster feeds your plants the extra compounds necessary in unlocking a harvest bursting with beautiful blooms.

- 01 | Natural flowering compounds promote steady ripening, resulting in a uniform flower canopy.
- 02 | The formula can be used in every cultivation system in combination with every kind of feeding.

- 03 | Rich with natural micronutrients and other ripening elements extracted from seeds and medicinal plants.
