1 Liter: Mix ATAK 10 ml + TRANSPORT 7.5 ml

1 Gallon: Mix ATAK 40 ml + TRANSPORT 30 ml

Mother Plants, Cuttings and Seedlings

Grow Weeks 1 to 4

Flower Weeks 1 to 8

3

FLOWERS & TERPS

SWITCH + TRANSPORT

Mother Plants, Cuttings and Seedlings

Only use in **FLOWER**

Grow Weeks 1 to 4

	Ltr.	Gal.
Flower Weeks 1 to 8	10 ml Transport into 1 L. Switch	40 ml Transport into 1 Gal. Switch

EXTRA TIPS

- Spray in cool temperatures between 60°- 75° F / 16°- 24° C.
- Application dates are **flexible**, can be used early to mid/late **flower**.
- Mix and use within **30 minutes**.
- We recommend **minimum 3 - 4 applications** over flower cycle.

Do not dilute Switch into water

TIPS AND TRICKS

- RO or Distilled water is recommended.
- Do not spray Stomata / undersides of leaves.
- Keep products **air tight** in a cool dark place. **WATTS & OVERGROW** are best stored in refrigerated conditions.
- Spray performance products every **2 days** for maximum benefit.
- Spray when **lights turn on** for best results.
- Mix larger batches of Concentrates (**Transport, Watts, Rev & ATAK**) and store for up to **2 weeks. Keep cool and airtight.**
- OVERGROW** mix can be **sprayed** before taking cuttings and transplanting.
- For **Pythium Root Rot**: Use **ATAK** in root zone with water or nutrients: **0.5ml / liter** or **2 ml / gal.**

SAFETY & COMPLIANCE

- SDS, Heavy Metals & Pesticide Analysis available online.**
 - Calculate your cost per spray** with our **online cost calculator.**
-

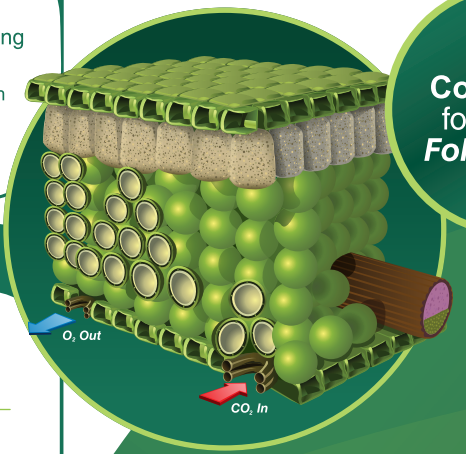

COMPATIBILITY

TRANSPORT is compatible with almost all IPM products with the exception of Biological IPM spray products.

Use any Oil based, Sulfur or Chemical IPM products at **Quarter Strength** with **TRANSPORT** full Strength.

Transport Dosage:

- 7.5 ml/L water
- 30 ml/ Gal. water

Aim for Efficiency

optic foliar
Est. 2009

Foliar Spray products that **directly improve your Mesophyll layers**

- Factory** of the plant
- Light Energy**
- Nutrition**
- Growth**
- Key for foliar performance**

Spray-it, See-it,
BE-LEAF-IT!!

OVERGROW

Guaranteed 30 minute foliar delivery to Mesophyll layer
Lights on spray
No pH adjustment
No damage or burning
No need to spray undersides

WATTS

Increases:
Photosynthesis
- Nutrient uptake tests:

29% More NPK
& **11% More Micro's**
4 Hours after spray

More Efficient GARDEN

TRANSPORT

Guaranteed 30 minute foliar delivery to Mesophyll layer
Wetter - Spreader
Lights on spray
No pH adjustment
No damage or burning
Reduce pesticides by 75%
No need to spray undersides

30 minutes guaranteed

SWITCH

Promotes oils & Flower production
Use early to late flower
Flower booster

TOP Product

EVIOS

NO oil based ingredients
NO smells
Late Flower safe
Passes testing - Pre and Post harvest
NO need to spray undersides
Direct contact not needed

REV

Increases:
- Leaf Nutrition
- Powerful Nutrients - Macro & Micro
Prevents Deficiency

ATAK

No **DAMAGE** to buds, hairs, leaves or trichomes
No effect on taste
NO residuals left in the plant
Safe to use on last few days of flower
