

DE-NAT

DE Natural
DUST-A-WAY

DE-NAT Dust-a-Way is an all natural non-toxic barrier that is made from ancient fossilised remains of a unique sea-kelp. This naturally refined compound provides many benefits for your garden. DE-NAT Dust-a-Way is comprised of specially sized Diatomaceous Earth (DE) particles.

Dust-a-Way is 100% chemical free. Therefore, safe for you and the environment.

- Natural source of silica
- Excellent thermal barrier and insulator
- Easy application shaker
- PH stable

DIRECTIONS:

Dry Application: Sprinkle over plants and their bases on the soil. To coat the underside of foliage use a squeeze - puff action.

Foliar Application: mix 15g of DE-NAT per litre of water. Spray all sides of plant and underside of leaves until wet, but not dripping.
Use in grow and first week of flower only.

STORAGE: Keep in a dry place.

CAUTION:

Do not directly inhale any fine dust from product. If dust is present always wear appropriate face mask and eye protection. Keep away from children.
