

HYBRID

WET AND DRY TRIMMING IN ONE MACHINE

Trim at any moisture level with variable speed controls that allow you to customize your output with the touch of a button. The revolutionary Flex-Knife™ system ensures constant contact with the blades for an ultra-clean cut. The powerful design allows the flower to spend less time in the tumbler, minimizing trichome and terpene loss. With an integrated kief collection system, preserve your kief for further processing.

TRIMS LIKE SCISSORS

PRECISION FLEX-KNIFE™

Factory-calibrated Flex-Knife™ system eliminates the need for blade adjustments.

INCREASE CAPACITY

Process up to 40 lbs per hour with one Hybrid. Double production up to 88 lbs per hour with tandem trimming units.

INTEGRATED TANDEM-LINK SYSTEM

The built-in interlocking system and user-friendly tilt adjustment ensure a seamless hook-up. No need for extra parts or rails.

REDUCED CLEANING TIME

Intelligent hose-free design, stainless steel components, and tool-free disassembly for easy cleaning.

TRIM AT ANY MOISTURE LEVEL

Fine-tune the vacuum suction, machine tilt, and tumbler speed to trim any strain and moisture content.

KIEF COLLECTION SYSTEM

Collect trim and kief with the intelligent double-bagging system. Trap your trim with the inner 200-micron food-safe nylon bag, while the outer bag collects extraction-ready kief.

SPECIFICATIONS

HEIGHT	43 IN / 108 CM
WIDTH	22 IN / 56 CM
LENGTH	39 IN / 99 CM
WEIGHT	<250 LBS / 113 KG
POWER REQ	120 V, 20 A
FEED RATE/HR	UP TO 40 LBS / 18 KG
