

# ALPHA

## RELIEF AIR VENTS

The Alpha Relief Air Vents have been designed to control air pressure within buildings. They may also be used in a ducted system where the fan is mounted remotely to the cowl. Fitted with bird mesh to eliminate the risk of debris and birds entering the building.

- Lightweight, corrosion-proof construction.
- Can also be used as air intake units.
- Protective bird mesh guards are fitted as standard.
- Base and cowl made of U.V. stabilised plastic.
- Designed for curb mounting.
- Can be mounted at angles up to 30°.

### TYPICAL APPLICATION

Exhausting clean air and a range of toxic, noxious and corrosive gases from a wide range of commercial and industrial applications.

### ACCESSORIES

- A range of upstands are available. For information on suitable upstands contact your local Fantech Trade branch.

**i** May be used as the air intake and discharge point where the fan is mounted remotely.
